

## **DESIGN AND ACCESS STATEMENTS**

In accordance with cabc publication Design and Access Statements, how to write, read and use them a valid Design and Access Statement must contain all of the following points. The attached checklist can be used to assist with the creation of the statement.

| Matter to Consider   | Have I included this point |   |     |
|--|----------------------------|---|-----|
|  | Y                          | N | N/A |
| <b>Step 1: Assessment of Context</b>   |                            |   |     |
| <b>Physical context: information about:</b>                                    |                            |   |     |
| <b>Surrounding:</b>  |                            |   |     |
| Uses   |                            |   |     |
| Buildings/character  |                            |   |     |
| Spaces   |                            |   |     |
| Access routes  |                            |   |     |
| Access to local services/transportation  |                            |   |     |
| Any special designation i.e. Conservation Area                                 |                            |   |     |
| <b>Site:</b>   |                            |   |     |
| Uses   |                            |   |     |
| Buildings/character  |                            |   |     |
| Spaces within the site   |                            |   |     |
| Access through the site  |                            |   |     |
| Natural features i.e. trees, hedges, water features                            |                            |   |     |
| Topography, gradients  |                            |   |     |
| Any special designation i.e. Conservation Area                                 |                            |   |     |
| <b>For a Listed Building:</b>  |                            |   |     |
| Historic and special architectural importance                                  |                            |   |     |
| Physical features justifying Listed status                                     |                            |   |     |
| Setting of a Listed Building   |                            |   |     |
| <b>Social Context:</b>   |                            |   |     |
| Any effect from loss of existing building/uses                                 |                            |   |     |
| Any potential overlooking/overshadowing from the site                          |                            |   |     |
| Impact on any local services   |                            |   |     |
| <b>Economic Context:</b>   |                            |   |     |
| Any jobs created   |                            |   |     |
| Any business created   |                            |   |     |
| Effect on attractiveness of area to investors                                  |                            |   |     |
| <b>Planning policies:</b>  |                            |   |     |
| Do the relevant National, Regional and local policies appear to be referred to |                            |   |     |

| Matter to Consider  | Have I included this point |   |     |
|---|----------------------------|---|-----|
|   | Y                          | N | N/A |
| <b>Step 2: Involvement of Community Members</b>   |                            |   |     |
| Have neighbours been consulted and the responses included   |                            |   |     |
| Beyond this, does the level of involvement appear consistent with the Statement of Community Involvement/scale of development                     |                            |   |     |
| <b>Step 3: Evaluation</b>   |                            |   |     |
| Is it clear how comments have been taken into account   |                            |   |     |
| If not, is it explained why not?  |                            |   |     |
| Are any constraints on development from physical/social/economic context identified and does this link to the scope/opportunities for development |                            |   |     |
| Are constraints from any relevant policies identified   |                            |   |     |
| <b>Step 4: Design of the Scheme</b>   |                            |   |     |
| <b>Use: Is this justified in terms of:</b>  |                            |   |     |
| Site and Surroundings   |                            |   |     |
| Land use policies   |                            |   |     |
| <b>Amount: Is there justification for:</b>  |                            |   |     |
| How much development is proposed (No. of dwellings or floorspace)   |                            |   |     |
| The way this is distributed on site   |                            |   |     |
| How it relates to its surroundings  |                            |   |     |
| <b>Layout: Are the following considered:</b>  |                            |   |     |
| Relative locations of different uses  |                            |   |     |
| Accessibility and travel distances  |                            |   |     |
| Gradient and topography   |                            |   |     |
| Crime prevention measures   |                            |   |     |
| <b>Scale: Are the following justified:</b>  |                            |   |     |
| Size of buildings in relation to surroundings   |                            |   |     |
| Size of entrances/facades in relation to human scale  |                            |   |     |
| <b>Landscaping: Are the following included:</b>   |                            |   |     |
| Landscaping principles and details  |                            |   |     |
| Future maintenance information  |                            |   |     |
| <b>Appearance: Are the following justified:</b>   |                            |   |     |
| Architectural style, design, detail   |                            |   |     |
| Materials, colours, textures  |                            |   |     |
| Any lighting proposed   |                            |   |     |
| How this affect accessibility   |                            |   |     |
| <b>Access:</b>  |                            |   |     |
| Is equal and convenient access for all users addressed  |                            |   |     |
| If this cannot be achieved, is justification provided   |                            |   |     |
