

# Selby District Council Local Plan Consultation

### "PLAN Selby" (The Sites and Policies Local Plan)

### **Initial Consultation Comments Form**

"PLAN Selby" is the Sites and Policies Local Plan which the Council is developing to deliver the strategic vision outlined in the Core Strategy that was adopted in 2013. When adopted, PLAN Selby will form part of the Local Plan for the District against which planning applications will be assessed.

This consultation is the first stage in our on-going dialogue with you and we hope that you will take time to respond to it and help us move forward. The responses to this consultation will help inform our work and shape the District for the future.

Comments are therefore invited as part of this Initial Consultation.

Please use this form to make your comments.

Please read the main document PLAN Selby and associated papers, which are available on the Council's website at <a href="https://www.selby.gov.uk/PLANSelby">www.selby.gov.uk/PLANSelby</a> and at local libraries and Public Council offices.

You will need to see what is in PLAN Selby in order to make your comments. It contains a wide range of issues and specific questions on which we would like your views. Please make sure you are clear about which part of PLAN Selby you are commenting on and ensure we have your full contact details so we can take your comments into account and so that we can contact you about the next stages.

## Completed comments forms must be received by the Council no later than 5pm on Monday 19th January 2015

## Comment(s)

Paragraph  The drawing of settlement limits is a restrictive policy application that allows little room for flexibility. When boundaries are lightly drawn around a settlement, little scope is allowed in policy terms for that settlement to grow. As such, we would not advocate the drawing of development limits as this does not provide flexibility across the plan period for vocusing delivery targets to be met. Planning policies relating to development management should be entirely capable of setting controls to ensure that development is located in appropriate and sustainable locations and that, where development is proposed that conflicts with key policies, applications are refused accordingly. Development limits impose an additional layer of control that is not compliant with the flexible approach set out in the NPPF and we would herefore contend that this policy restriction is inflexible and unnecessary. However, if through the PLAN Setily process tis decided that development limits are to be set, then we would advocate that these be drawn loosely around settlements to allow a degree of room for growth. It is also vitally important that any limits set are justified clearly in the supporting text to any policy and that these are supported by a relevant and up to date evidence base.  Topic / Chapter  Chapter 3  Question no.  23a Paragraph  While we recognise the role of Strategic Countryside Gaps (SCGs) across the district, care should be taken in allocating new gaps as, as with settlement boundaries, this is an inflexible policy approach that restricts development. A balanced approach is therefore required that weighs the potential allocation of SCGs against the requirements for nonressed housing delivery across the plan period. We would therefore contend that it is unnecessary to draw a new SCG between Setby and Thorpe Willoughby as to do so would be to impose a further restriction on development that it not necessarily compliant with the need to sustainably grow both Setby (in its key role as the principal tow	Topic / Chapter	er 'annet tilderenhe er en ereteriamet Base Milit	Chapter 3	
would not advocate the drawing of development limits as this does not provide flexibility across the plan period for rousing delivery targets to be met. Additional Comments - Please provide any additional comments you may wish to make.

#### Chapter 5, Question 43a

We consider that there is scope for further growth at Brayton and that, as per our earlier answer to Q9a, the level of development proposed should reflect the status of Brayton as the largest of all 18 DSVs (i.e. the development targets for the 18 DSVs should not simply be divided up equally amongst all of the settlements). Any development in Brayton should be well related to the existing settlement pattern and, as such, we would propose that the land (reference BRAYTON/017) submitted on behalf of our client previously would represent an appropriate location for further development.

Chapter 5, Question 57a

We consider that there is scope for further growth at Thorpe Willoughby and that, as per our earlier answer to Q9a, the level of development proposed should reflect the status of Thorpe Willoughby as one of the largest of the 18 DSVs (i.e. the development targets for the 18 DSVs should not simply be divided up equally amongst all of the settlements). The current settlement pattern at Thorpe Willoughby lends itself to development in a westerly direction as this is where a number of defensible boundaries are located in the form of the existing road network. Were the settlement to grow in an easterly direction, there are no obvious defensible boundaries that would limit development to a scale that would be appropriate to the size of the settlement. As such, any development in Thorpe Willoughby should be well related to the existing settlement pattern and, in line with this, we would propose that the land (references THORPE/004 and THORPE/005) submitted on behalf of our client, when combined with land (references THORPE/007 and THORPE/008) promoted separately but in conjunction with our clients land, would represent an appropriate location for further development.
