Dear Ryan King, thank you for letting me know my points hadn't been received.
 I had a couple of points

Q32 travel plans - I think if there are to be better links to Leeds and York then there must be better public travel links for the Eggborough and Whitley area for all the 'commuters' moving to the area. Currently there is only one train per day to and from Leeds and you cannot get to York easily. I am not sure on the frequency of the Selby train. The M62 is busy and only getting worse year on year so any help to reduce congestion must be good?

Q48 development plans - there is a proposal to build more housing on learning lane near the existing school and nursery. The school is already at its limits for the current demand. Surely it would make more sense to build a new school/expand the current school to meet the growing demand for the area on this site so that the current school and nursery are all located on one area, making it better for parents and safer for children, rather than having to build elsewhere and then parents having to be split between sites.

I also feel development if any around the pub would make more sense as it keeps the pub at the centre of the village of Whitley.

Regards

Robert Jeffery
