Dear Sir

Selby District Local Development Framework – Core Strategy

Wistow Parish Council has the following comments to make on the above document :-

1. The document is well written and deals with the major development ideas for the District.
2. Wistow should remain as a non -service village for the foreseeable future.
3. Housing development in Wistow should be continued at slow rate with small infill plots being used. These to be agreed with the Parish Council through the existing planning process.
4. Both a parish plan and village design statement have been published for the village and any development should follow the criteria in these documents.
5. The existing Wistow mine site should not be developed but should be returned to agricultural use.
6. Windfarm development should not be allowed in the District to the detriment of existing settlements and nature areas (e.g. Bishop Wood).

Yours faithfully

J W Wildash
