Subject: core strategy

To LDF Team,

We object to the proposed document as it is not providing for enough dwellings over the period or per year, we believe the number should be 500 per year as this is the average of all the studies done.

We object to the allocation of numbers per year this should be left to the supply and demand as it is impossible to plan for the unforeseen such as in 2008 when numbers dropped.

The green belt review needs to be thorough and provide for enough dwellings in all villages that have been starved of dwellings over the past 20 years.
