**Subject:** Question 26e Seaparation distances

Name Paul Smurfit

Please ensure you provide reference to the Question and Topic area for each comment you wish to make.  
Topic / Chapter

Question no. 26e

Comments The minimum distance should depend on the size of the turbines eg approx. 2km for large turbines. If turbines get bigger this distance should be increased. The cumulative effect of a number of turbines should also be taken into consideration.

Question no.

Question no. 26a

Comments Remove SP 17 and replace by a policy designed to maximise renewable/low carbon energy in such a way it minimises the adverse impact on Selby District

Question no. 26e

Comments 2km should be used for large turbines 145m. This should be increased for 200m high turbines. The number of turbines needs to be taken into consideration also
