**Subject:** Selby district plan

Dear Sir,

Having read through the Plan Selby, I have great concerns about the District Council plans for the development in Brayton. If all the allocated sites in the village are built, the council will be dumping almost 4,000 properties in the area which will more than double the size of the village.

It has to be remembered Brayton is a village, with very limited facilities. There is just one small play area and even that is not in the best condition.

Minor road in that area were designed for coach and horses – yet to day have to deal with cars, vans and even HGV's – yet no one is prepared to help the parish council improve these roads.

Traffic on the A 19 speeds through the village despite a 30 mph restriction and the road outside the village CoE primary school are choked with traffic during term time with children's lives being put at risk.

if development is to go ahead —then the heart Brayton will be ripped out and vast sums of money will have to spend upgrading roads and village school which is oversubscribed some of whom are taught in portable classrooms. Brayton Barff pre-dates the Ice Age and must be preserved for generation to come, possibly with a Countryside Walk lined with trees in fields at its base. Conservation of the Selby Canal must also stretch from Burn right through to Selby.

Cllr Ian Chilvers
