

Note
 Map shows Yorkshire Water (YW) DG5 data at a 5 digit postcode scale. The DG5 register does not indicate areas or properties at risk of future flooding. It indicates areas that have been reported to YW that have experienced flooding during the last 100 year period as a result of insufficient hydraulic capacity in the sewer network. It is important to note that maintenance work may have been undertaken by W since the flooding incident(s) occurred. More detailed information should be requested from YW for site specific FRAs.
