July 2008	Foul smelling kitchen & Living room following heavy rain.	covered all plug holes and waste pipes
Today	<p>Since moving into this property we have had to suffer foul smelling, blocked drains from outside and inside the house. This happens almost every time a moderate amount of rain falls and we frequently see 'Drains Aid' making seemingly futile attempts to solve the issue each time. We have installed newer waste pipes with lighter fittings to marginally improve the smell when it occurs. The problem is severe and reminiscent of putrid Victorian England.</p>

	<p>I moved onto the property approx 10 yrs ago and because of some boundary problems it was deemed that my sewerage tank was not on my property & it would need to be altered. In approx 2004 I contacted John Water / various people to see if it was possible to go onto a Mains pipeline for sewerage rather than having to have a new tank put into my garden. I was told this would not be possible as it would cost too much.</p> <p>It ended up costing me £8000 to have a new septic tank put in, plus obviously all the ongoing costs of emptying etc.</p> <p>I would rather than consider everyone already in the village being able to get mains sewerage than any new properties coming in.</p> <p>From the above statement, obviously I do not have problems with any mains sewerage but I do notice the terrible smells from the mains / grates many times when you walk through the village. Ask any person about Fairloom & the 1st thing they say is "It Smells".</p>

27/SEPT/2011	myself and my wife have lived at the above address for the past seventeen years and have noticed a nasty smell going down Top Fold and along silver street for a long time now. some time during the day. My daughter has just bought 3A TOP FOLD Fairburn before she moved she received a letter from Selby Council. asking for permission to dig up her garden to repair a broken drain she got permission and they came and dug a hole and took out a length of broken drain and re placed it when I went round you could see where the sewage had been backing up in the sink waste my daughter who has had a serious cancer operation and is still under treatment moved in on the 24/9/2011 and was awake all night with the smell and as had it ever since. some time during the day her neighbour told her to Day 27/9/2011 this as gone on for years and can not use her garden in the summer for the foul smell being so bad this is not wye wye please continue on a separate piece of paper if required. and its time this problem was put right ASP.	

Any information you can provide will be helpful. Before someones health is affected

Thank You.

Yours Faithfully
TSM Ward

PS my daughter telephoned the water board and they say they will send someone out on the 28/9/2011 to inspect the drains again

	<p>Whilst we agree that the current drainage system in Fairburn would not cope with any further development, we personally have not had any problems.</p> <p>However, we do know that several of our neighbours have and, therefore, we are not in favour of any more building development.</p>

<p>JUST BEFORE 6 MONTHS TUES. March 22nd 2011</p>	<p>one of our old people was been buried and the family Decided to walk behind the Coffin to church. The street was running in <u>Silver Street</u> Rows sewage the grates had decided to run over this was a total disgrace. Still nothing done about it and on The Thursday 24th March 2011 it was backed up the drains as far as Great North Road Cottages as you see we live there and what a mess all over our gardens and next door we have 3 children wanting to play and couldn't. We rang Drain Ade and the Water Board but the Drain ade came out and after inspecting our drains and Arndale House drains below us and the Graces drains, found out it was solid right through to the main drain in Silver Street. He said I would have to pay £105 before he would release it and if it took longer than an hour it would be double. I told him then he would have to empty the Main drain on Silver Street before ours would move as this as happened to us quite a number of times.</p>	<p>When is it going to end? as it means the street after, it makes you sick</p>

Thank You.

3 The Cottages
Great North Road
Farnham
Wf 11 954.

They the Water Board and Drain Age decided it would have to be cameraed as it was a real mess, but how many times do they have to keep coming out to do this. They have bolted 2 or 3 grate tops down near Luke Well Farm and the Old post office.

Spoke to Tony Sydwell one of Water Board officers asked him when he thought they would flush the pipe through and camera it he said probably next week.

5th April 2011 Tues.

Rang Drain Rod as drains were full and running over again. Said they would be here between 6 am and 6 pm. Could it wash at shower as if again was running all over the garden's. Blocked all the way.

down to the Street and main drain
again. Everytime the main drain is blocked
we have this problem, I was determined I
was not paying another £105 so I rang
Tony Sydwell because knows the score
and he know how it all works. The System
for these 9 properties which keep on getting
blocked are not on the maps which the water
board have. They were put down in 1950.
Finally on the 6th April 2011 the Water
Board came out into Silver Street and it
was ~~not~~ flushed through and Camered. I
went down in the street to have a look
still dont know the out come.

7th April 2011

Again we were blocked and full to top
so drain Ade had to come out again.
All goes back to the drains been inadequate
cant cope, after all these millions which have
been spent. Replaced a drain in 3A Topfoldgarden.
But the stench on Silver Street and Top
Fold, and all our drains, is really Bad.

Rita
