## Introduction 1

## 1 Introduction

### 1 Introduction

*NOTE: The modifications have been updated as of 4 October 2016 to provide consistency between the figures in the trajectory and the indicative figures set out under Policy HC2 and within the Housing Allocation Statements. These minor amendments can be viewed under SBLP-MM\_012B, 015B, 015C, 020 & 020B (for Policy HC2) and SBLP-MM\_054B, 057B & 058 (for the Housing Allocation Statements). This document has been updated to accord with those alterations.*

**1.1** This Supplementary Report has been prepared to assess the proposed Main Modifications to the Scarborough Borough Local Plan 2011-2032 in relation to the Sustainability Appraisal (SA) required under the Planning and Compulsory Purchase Act 2004 which has been prepared in accordance with the requirements of the EU Strategic Environmental Assessment Directive. It should be read in conjunction with the full SA report of the Publication version of the Local Plan prepared in November 2015 as, in assessing the proposed Main Modifications to the Local Plan, this supplementary report seeks only to assess whether the Main Modifications change the effect the Local Plan may have on the SA Objectives, and so the sustainability of the Local Plan as a whole.

**1.2** The Main Modifications have arisen prior to the Examination hearings as a result of new evidence that emerged after Submission of the Local Plan and in relation to comments received.

**1.3** The Main Modifications are split into 2 categories:

- Those affecting the text of the Plan
- Those affecting the Policies Map

**1.4** Appendices A and B provides a full modification-by-modification assessment of any potential effect on the SA Objectives, while Appendix C provides an assessment of the potential effect of the changes to the Policies Map.

**1.5** This supplementary report has been prepared by officers of Scarborough Borough Council. The methodology used is the same as that in the Local Plan Publication SA Report and a detailed explanation of the methodology is provided in that report.

**1.6** The methodology utilises a set of SA Objectives established in the SA Scoping Report, groups these Objectives under applicable topic areas and then seeks to assess the effects of the Local Plan (or in this case the Main Modifications to the Local Plan) on those topics. The following table provides the topic areas and their SA Objectives that have been used in the assessments in this supplementary report.

#### Sustainability Objectives

<b>Economic Activity</b>
1. Provide conditions which enable business success, economic growth and investment in both urban and rural locations and contribute to a broad range of good quality employment opportunities.

## Introduction 1

<b>Community/Health</b>
2. Achieve affordable, good quality housing in accessible locations.
3. Promote good physical and mental health by ensuring that everyone has access to health, education, leisure, sport and recreation facilities.
4. Improve the safety and security of people and property.
<b>Land Use and Development Patterns</b>
5. Provide good access to facilities and services.
6. To provide a sustainable transport network that encourages the use of public transport, cycling and walking and minimises traffic congestion and enhances connectivity.
7. Promote efficiency of land use through maximising the re-use of previously developed land and existing buildings.
<b>Environmental Protection</b>
8. Protect and enhance all aspects of the coastal and marine environment.
9. Protect and enhance the landscape character.
10. Protect and enhance the built environment.
11. Protect and enhance the biodiversity of the Borough
12. Minimise the risk of flooding to and as a result of new development.
13. Enhance the quality and accessibility of the Borough's green infrastructure network.
<b>Resource Use and Climate Change</b>
14. Use natural resources (including water) prudently and efficiently and minimise the production of waste.
15. Minimise climate change and reduce the vulnerability to the impacts of climate change.

# 1 Introduction

## Summary of Findings 2

## 2 Summary of Findings

### 2 Summary of Findings

#### Summary of Findings

**2.1** The following series of tables sets out the summary findings of the effect of the Main Modifications to the Local Plan and the Modifications to the Policies Map on each topic area, and how this affects the overall effect of the whole Local Plan on each topic area. This summary is based upon the full modification-by-modification assessment provided in Appendices A and B and the Modifications to the Policies Map provided in Appendix C.

**2.2** Whilst the modifications are titled Main Modifications many are relatively minor in nature, mainly for correction or clarification. Throughout the plan process the Council has worked with statutory undertakers to agree suitable policy wording. As a consequence the Council are suggesting very few Main Modifications and none which would have a substantial effect on the Sustainability Objectives.

**2.3** Each table below, and in the Appendices, uses the following key to indicate the overall effect of a modification on each topic:

Very Positive	Positive	No Effect	Negative	Very Negative
++	+	0	-	--

#### Summary of Effects by SA Topic

Local Plan with Main Modifications		Modifications to Policies Map	
+	After more detailed investigation a number of sites have had their yield increased this has not increased the site areas or greenfield land take. This allows opportunities for economic growth.	0	There are no effects anticipated from modifications to the Policies Map

Table 2.1 Economic Activity

Local Plan with Main Modifications		Modifications to Policies Map	
+	Where there has been an increase in yield it increases the access to housing. The protection of existing health facilities promotes access to health.	0	There are no effects anticipated from modifications to the Policies Map

Table 2.2 Community/Health

Local Plan with Main Modifications		Modifications to Policies Map	
0	The proposed Main Modifications are not as such that they would have an effect on Land Use and Development Patterns	0	There are no effects anticipated from modifications to the Policies Map

Table 2.3 Land Use and Development Patterns

## Summary of Findings 2

Local Plan with Main Modifications		Modifications to Policies Map	
++	Changes to some policy wording seeks to strengthen the protection of the landscape, built environment and minimise the risk of flooding	0	There are no effects anticipated from modifications to the Policies Map

Table 2.4 Environmental Protection

Local Plan with Main Modifications		Modifications to Policies Map	
0	The proposed Main Modifications are not as such that they would have an effect on Resource Use and Climate Change.	0	There are no effects anticipated from modifications to the Policies Map

Table 2.5 Resource Use and Climate Change

## 2 Summary of Findings

## Summary Conclusions 3

## 3 Summary Conclusions

### 3 Summary Conclusions

#### Summary Conclusions

**3.1** The summary findings in the tables above show that, overall, the Proposed Main Modifications to the Local Plan will have a positive effect on the sustainability of the Local Plan and the sustainability of Scarborough Borough. This therefore means that the overall positive assessment of the Local Plan that was found in the SA Report of the Local Plan Publication is maintained with the Proposed Main Modifications.

**3.2** With the Local Plan Publication version, the key negative effects revolve around the release of greenfield land for development and the effect this has on land resources and other environmental factors. The Proposed Main modifications do not propose any new land uptake. Ultimately, there is a need for new housing and employment development over the Plan period and this need cannot be solely accommodated within the existing built-up areas of the Borough, so a degree of impact on environmental factors is to be expected. This will lead to an ongoing impact beyond the Plan period on some environmental factors as still more land will likely need to be released for development in the future.

**3.3** However, the SA of the alternatives demonstrate that the Local Plan and the Proposed Main Modifications are seeking to allocate that land which has the least negative impact on the environmental factors at risk when greenfield land is developed. This is certainly the case with the Assessment of Alternative Sites in the Addendum to the Local Plan SA. The preferred allocation for housing sites (South of Cayton) and the preferred allocation for employment land (an extension to the Scarborough Business Park) both have an overall positive effect on the SA Framework, whereas the majority of the alternatives were found to have a negative effect.

**3.4** What also comes through the SA of both the Proposed Main Modifications and the Local Plan Publication Version is that many of the development management policies will have a positive effect in preventing negative impacts on environmental factors or mitigating for them. Within the Proposed Main Modifications an example of this is the improved policy for Environmental Risk.

**3.5** Ultimately, the effects of the Proposed Main Modifications have a relatively minor positive effect on the sustainability of the Local Plan, which is unsurprising given that the Proposed Main Modifications themselves only constitute relatively minor amendments to the Local Plan relative to the whole scope and extent of the Plan itself. This is reflected in the fact that, the monitoring indicators within Chapter 11 of the Local Plan have not been modified and there is no need to identify any further indicators to monitor as a result of the findings of this SA.

**3.6** Therefore, the conclusion of this Supplementary Report on the SA of the Proposed Main Modifications to the Scarborough Borough Local Plan 2011-2032 is that the Proposed Main Modifications will have little impact on the sustainability of the Local Plan, but where they do, overall, it is a positive impact, and so the Modified Local Plan will still have a positive effect on the sustainability of Scarborough Borough.

## SA of Modifications 001-030 A

**SBLP-MM\_010: Policy HC 2 (HA 4) Land at Yorkshire Coast College, Lady Edith's Drive, Scarborough**

SA Objective: Will the Policy ...	Score	Positive Effects	Negative Effects	Neutral / No Effects / Unknown
<b>Economic Activity</b>				
1. Provide conditions which enable business success, economic growth and investment in both urban and rural locations and contribute to a broad range of good quality employment opportunities.	+	Increased yield for Site HA 4 will provide a more viable site and increase investment		
<b>Community/Health</b>				
2. Achieve affordable, good quality housing in accessible locations.	+	Increased yield for Site HA 4 will increase the affordable housing delivery		
3. Promote good physical and mental health by ensuring that everyone has access to health, education, leisure, sport and recreation facilities.	0			Increased yield for Site HA 4 as previously the adjacent Open Space Allocation (OS 5) was not taking into account when calculating a yield for the site.
4. Improve the safety and security of people and property.	0			Increased yield for Site HA 4 as previously the adjacent Open Space Allocation (OS 5) was not taking into account when calculating a yield for the site.
<b>Land Use and Development Patterns</b>				
5. Provide good access to facilities and services.	0			Increased yield for Site HA 4 as previously the adjacent Open Space Allocation (OS 5) was not taking into account when calculating a yield for the site.
6. To provide a sustainable transport network that encourages the use of public transport, cycling and walking and minimises traffic congestion and enhances connectivity.	0			Increased yield for Site HA 4 as previously the adjacent Open Space Allocation (OS 5) was not taking into account when calculating a yield for the site.
7. Promote efficiency of land use through maximising the re-use of previously developed land and existing buildings.	0			Increased yield for Site HA 4 as previously the adjacent Open Space Allocation (OS 5) was not taking into account when calculating a yield for the site.
<b>Environmental Protection</b>
